British Science Week

From Monday 14th to Friday 18th March, we are celebrating British Science Week 2022 here at Townley Grammar School. We have lots of fun and exciting events planned for our students to take part in across the Biology, Chemistry and Physics departments.

This week our Science Scholars introduced the event to the rest of the school through their BSW Assembly, incorporating videos and simulations. They also highlighted the work of key women in STEM, to commemorate International Women's Day.

As part of the celebration our sixth form science, maths and computing students are holding a STEM Fayre in the theatre on Wednesday. They will be sharing their passion for science by holding stalls to showcase their areas of interest with their peers. During the afternoon session, Year 12 will also be entertained by a spectacular show from Neil Monterio of Science Theatre.

Earlier this week, our Year 9 Students celebrated STEM in the Science Department, taking part in the 'Making Perfume Session' using a range of flowers, fruits and herbs using steam distillation. This was a great opportunity for them to experiment in mixing together different leaves, petals and peel for create their unique fragrances. Lots of fun and hands on experience, setting up the steam distillation apparatus, with the help of our Year 12 science ambassadors.

The Year 9 students also had the opportunity to take part in the Forensic CSI session where they analysed clues such as fibre and blood samples to identify the perpetrator of a crime.

Throughout next week sessions are running across the department for students to have fun exploring the theme of 'growth' in British Science Week.

Look out for the activities and schedule that has been planned on the British Science Week Google Classroom and Google Site !!!!

We are excited to be running this live again with you!
